**ABOUT THE TRANSITION TO THE ICAO VERTICAL SEPARATION SYSTEM
AND REDUCED VERTICAL SEPARATION MINIMUM (RVSM)
FROM FL 290 TO FL 410 INCLUSIVE
IN THE AIRSPACE OF THE KYRGYZ REPUBLIC EFFECTIVE
FROM 17 NOVEMBER 2011**

This AIC is published for the purpose of notifying the transition to the ICAO vertical separation system and Reduced Vertical Separation Minimum (RVSM) from FL 290 to FL 410 inclusive in the airspace of the Kyrgyz Republic effective from 17 November 2011.

This Circular replaces AIC 01/10.

**ABOUT THE TRANSITION TO THE ICAO VERTICAL SEPARATION SYSTEM
AND REDUCED VERTICAL SEPARATION MINIMUM (RVSM)
FROM FL 290 TO FL 410 INCLUSIVE
IN THE AIRSPACE OF THE KYRGYZ REPUBLIC EFFECTIVE
FROM 17 NOVEMBER 2011**

1. GENERAL PROVISIONS.

The ICAO cruising levels shall be applied in the entire airspace of the Kyrgyz Republic, and Reduced Vertical Separation Minimum (RVSM)* shall be applied from FL 290 to FL 410 inclusive.

2. TABLE OF CRUISING LEVELS.

* Due to the fact that the units for quantities of the International System of Units (SI system), adopted by the General Conference on Weights and Measures and recommended for application by the International Legal Metrology Organization, are applied in the Kyrgyz Republic - altitudes, elevations and heights are measured in metres. Altitudes and heights can be measured in feet (ft) in the Kyrgyz Republic for providing the flights of aircraft, equipped with vertical separation systems, carrying out the measurement of altitude in non-SI units. Flight level allocation by ATS unit shall be carried out in flight level numbers.

** The direction of the track shall be determined by true north.
